

- ❑ Hit the server endpoint <http://localhost:8888/config-1/default> and list all properties (of client "config-1" read from [config-1.properties](#) committed here <https://github.com/cdcdd15/07-config-server/blob/master/config-1.properties>)
- ❑ Modify value of one property, commit it, refresh the client (make post request on <http://localhost:8080/actuator/refresh>), hit the client endpoint (<http://localhost:8080/config> endpoint generated by controller `com.cosmin.ReadPropertiesController`) and notice the value change
